

Homework 1

Gustavo Adolfo Vargas Hákim

1. Import the 2018 Storm Events data and determine on which months have the most tornadoes.

The month with the most tornadoes is May.

2. Using the same data set, which is the third most frequent event type?

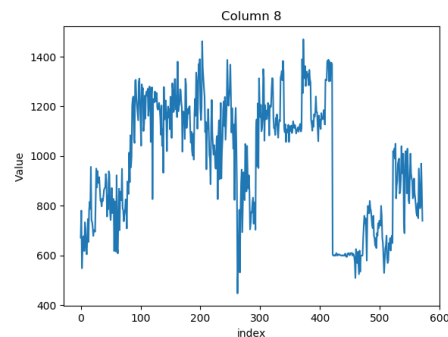

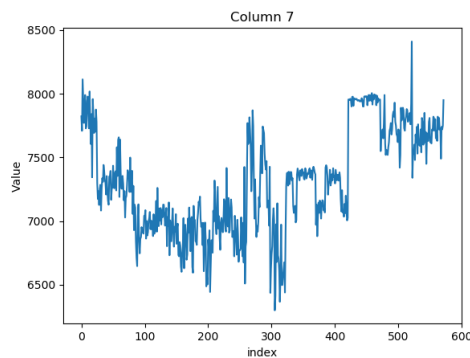

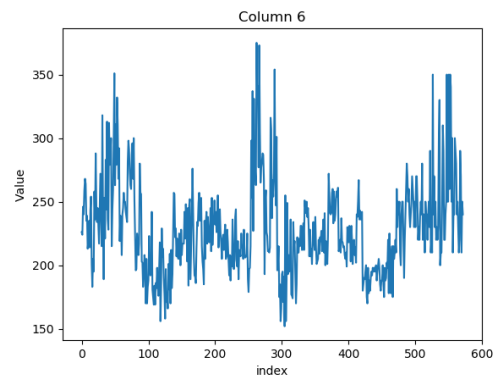

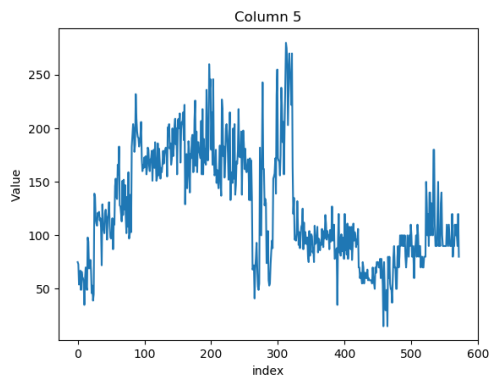

The third most frequent event type is Flood.

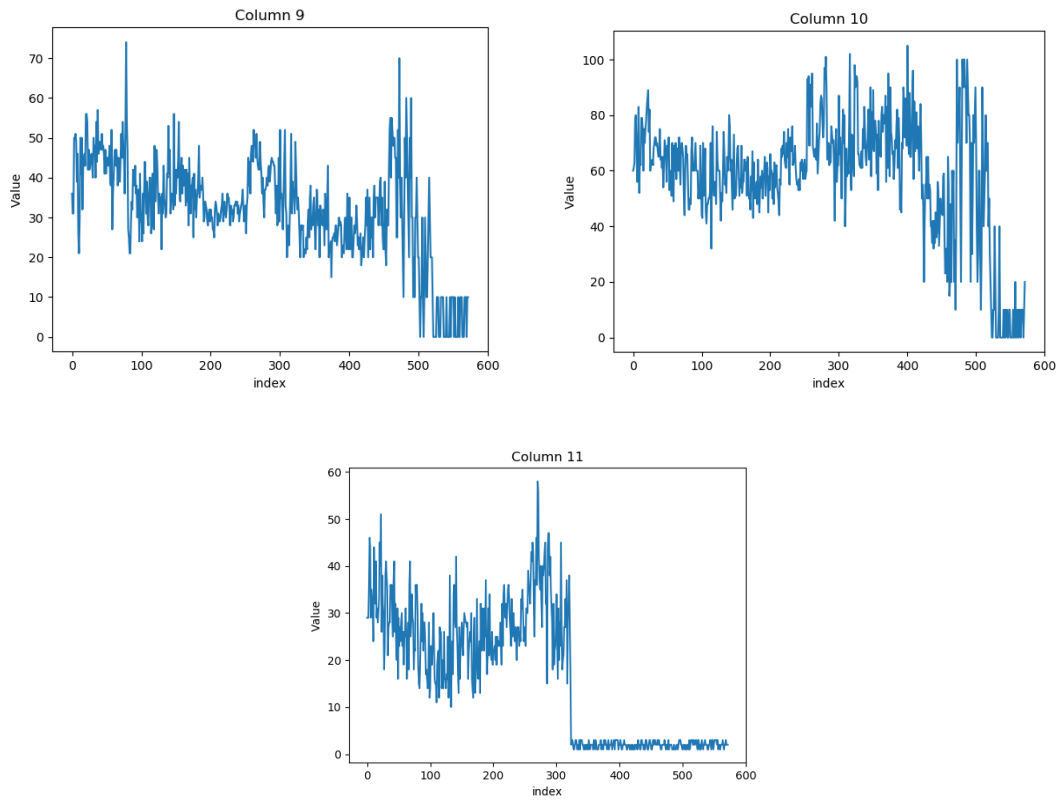

Import the file named “hw1.csv” available in the Teams Files of the course.

3. Identify the data types on each column

Col	1	2	3	4	5	6	7	8	9	10	11
Type	str	Int64	Int64	Int64	str	str	str	str	str	str	str

4. Plot the values of columns 5 through 11, each column individually, beginning from the second row

5. Plot the values of columns 11 and 5 together.
